

## Openwork Graphene C1 Balanced Model Portfolio

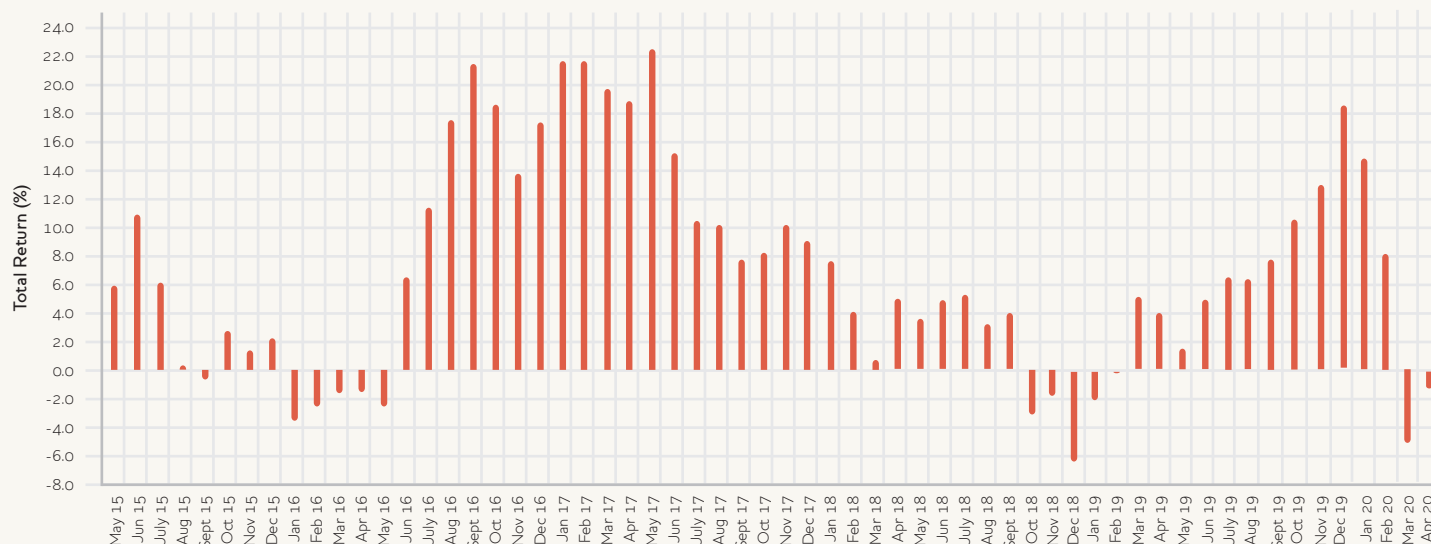

Launched in March 2014, the Openwork Graphene C1 Balanced Model Portfolio is designed to offer you, as a Balanced client, a well-diversified portfolio investing in a range of Omnis funds.

### Since launch...

The portfolio has generated positive returns in **52** of the 63 twelve-month periods since launch.

The average of the 12-month gains periods is **9.61%** (52 periods).

The average of the 12-month loss periods is **-2.44%** (11 periods).

Source: FE Analytics, chart shows rolling 12-month returns since launch.  
Averages are for all portfolios. CAGRs are since launch.

### The last 12 months...

When investing, it is always important to take a medium to long-term perspective. This is because shorter term periods can be much more volatile and deliver lower and sometimes negative returns, as illustrated by the rolling 12 month periods shown above. In the last 12 months (up to 30 April 2020), the Openwork Graphene C1 Balanced Model Portfolio suffered a loss of -1.11%, with the performance over the longer-term being more positive.

1 year	2 years	3 years	Since launch
-1.11%	2.86%	7.67%	38.54%
