

# Openwork Graphene C1 Defensive Model Portfolio

## Portfolio Objective

The portfolio is designed for investors who are looking to minimise their exposure to risky assets for short periods of time. This might be someone who is looking to consolidate gains ahead of a specific objective or who is worried about the prevailing market conditions. As such, they will have a preference for outcomes that have a degree of certainty. While they understand that the value of their investment could fall or rise, the level of these is likely to be lower than portfolios which invest more in risky assets (like global equities). They know that this is not a long-term holding for their investment as the value is likely to diminish in real terms over time.

The portfolio is invested in a range of Omnis funds managed by highly regarded specialist fund managers who are experts in a particular field.

The portfolio's returns will be shown relative to the IMA Mixed Investment 0-35% Shares Sector Average, although it should be noted that the objective will be to provide a defensive long-term investment rather than seeking to produce a superior return relative to the sector average, many of whose funds may have a strategically higher exposure to equities.

## Risk Range

The Openwork Partnership will risk-rate investors based on their answers to 10 questions and appropriate validation.

○ Limited risk
 ○ Cautious
 ○ Balanced
 ○ Adventurous
 ○ Speculative

This portfolio is risk-rated as Limited Risk

(Note that it is not designed to be held as a medium to long-term investment.)

**Launch Date** 31 October 2019

## Discrete Annual Performance (as at 31 December 2020)

	31/12/2019 31/12/2020	31/12/2018 31/12/2019	31/12/2017 31/12/2018	31/12/2016 31/12/2017	31/12/2015 31/12/2016
Portfolio	5.96%	-	-	-	-

The above figure shows the indicative performance of the Portfolio based on the assets being rebalanced back to the Strategic Asset Allocation on 1 July and 1 January. Your individual performance will depend on the date of your investment and the 6-monthly dates when your own portfolio is rebalanced.

When investing, it is always important to take a medium to long-term perspective. This is because shorter term periods can be much more volatile and deliver lower and sometimes negative returns, as illustrated by the rolling 12 month periods shown above.
