

Openwork Graphene C1

Cautious Model Portfolio

Portfolio Objective

The portfolio is designed for a cautious investor. This is someone with limited experience of investment products, who is likely to be more familiar with bank and building society accounts rather than other types of investments. In general terms, they will understand that investment products should be held for a minimum period of five years. They will have a preference for outcomes that have a degree of certainty although they will understand that in certain circumstances their investments could fall or rise.

The portfolio is invested in a range of Omnis funds managed by highly regarded specialist fund managers who are experts in a particular field.

Strategic Asset Allocation

Discrete Annual Performance (as at 30 April 2021)

	30/04/2020 30/04/2021	30/04/2019 30/04/2020	30/04/2018 30/04/2019	30/04/2017 30/04/2018	30/04/2016 30/04/2017
Portfolio	7.97%	4.76%	4.59%	2.25%	13.35%

The above figure shows the indicative performance of the Portfolio based on the assets being rebalanced back to the Strategic Asset Allocation on 1 July and 1 January. Your individual performance will depend on the date of your investment and the 6-monthly dates when your own portfolio is rebalanced.

When investing, it is always important to take a medium to long-term perspective. This is because shorter term periods can be much more volatile and deliver lower and sometimes negative returns, as illustrated by the rolling 12 month periods shown above.
